In this video, we'll be talking about Maths by Asad Zulfiqar. We'll discuss the concept of Continuity and Discontinuity. We'll explore the relationship between the function and its graph, and how to identify points of discontinuity. We'll also discuss the concept of limits and how they relate to the function's behavior. We'll cover the following topics:

- Continuity: A function is continuous if it is defined at every point in its domain and the graph is a single unbroken curve.
- Discontinuity: A function is discontinuous if it is not defined at every point in its domain or if the graph has a jump or a hole.
- Limits: A limit is the value that a function approaches as the input approaches a certain value.
